Work Experience

UX UI Product Designer - Allure Commerce | 2024-Present

- Led end-to-end UX and UI design for multiple e-commerce products, from problem definition and user flows to visual design and developer handoff, typically across 30-50 screens per project.
- Translated complex business, technical, and operational requirements into clear user journeys and product experiences, balancing user needs with business and engineering constraints.
- Used analytics, tracking tools, and user behavior insights to identify friction points and inform design decisions across e-commerce experiences.
- Helped streamline the design process by defining scope, estimating design effort, and working with PMs to ensure design requirements were accurately captured in project SOWs.
- Standardized design workflows and documentation across projects, making requirements, handoffs, and design decisions clearer for PM and engineering teams.
- Introduced a pre-launch design QA process, reviewing frontend builds against Figma to ensure design accuracy before release.
- Contributed to product discussions and roadmap decisions for internal tools, identifying opportunities to improve workflows and product experience.
- Mentored junior designers through design reviews and project guidance, while contributing to AI-enabled design workflows that reduce repetitive tasks and improve the team's capacity for higher-value design work.

Freelance Graphic Designer | 2021-2022

- Delivered independent graphic and digital design projects including editorial assets, social media creatives, presentation decks, video design, and landing pages.

Education

Postgraduate Diploma in Digital Design & Communication - Ecole Intuit Lab, Mumbai | 2022-2024

- Coursework focused on visual design systems, branding psychology, design strategy, art direction, and applied graphic design.

Bachelor of Arts in English Literature - University of Mumbai | 2017-2020

Skils

- Product Thinking & User-Centered Design
- Product Requirements & UX Strategy
- Interaction Design & Information Architecture
- UX Audits & Experience Optimization
- Data-Informed Design
- AI-Assisted Design Workflows
